Senior Product Manager (AVP) with 7+ years building 0-to-1 GenAI, agentic AI, and FinTech products across regulated enterprise and consumer scale. Owns the full product lifecycle for document-intelligence and credit-decisioning platforms, from evaluation frameworks and model routing to compliance-grade governance - driving 35% accuracy gains, 40%+ reduction in manual workflows, 50% support deflection, and 38% lower acquisition risk. Builds independently too: shipped two 0-to-1 AI products (ClearCFA, TripCanvas) solo, from concept to paying users.

PROFESSIONAL EXPERIENCE

JPMorganChase | Senior Product Manager, GenAI & Document Intelligence, Lending (AVP) Dec 2025 - Present

- Owned the end-to-end product roadmap for DARwin, a document-intelligence platform spanning OCR, classification, extraction and human-in-the-loop review, driving a 35% improvement in extraction accuracy and a 40%+ reduction in manual review effort.
- Engineered field-level validation logic combining model-confidence thresholds, business rules and source-of-record checks, cutting false positives 20%+ and document turnaround time 30%, directly reducing operational risk in a regulated lending workflow.
- Defined the straight-through-processing product vision, eligibility logic, risk thresholds and seven operational KPIs, creating a phased roadmap targeting 50%+ auto-pass while preserving precision, traceability and auditability.
- Redesigned an approximately 10-day manual onboarding process into a five-stage AI-assisted workflow covering schema discovery, template creation, coverage validation, prompt refinement and testing, targeting completion within one sprint.
- Architected exception-led review workflows for borrower/co-borrower mapping and low-confidence routing, strengthening consistency and audit traceability across four critical operational controls.
- Defined a Smart Review Assistant that classified source-of-record comparisons as exact, different or approximate matches, improving reconciliation consistency and reviewer decision quality.
- Aligned 6 stakeholder groups through PRDs, customer journeys, governance controls and phased releases, operationalizing regulated AI delivery across product accuracy, compliance, model risk and operations.

Jio Platforms Limited | Senior Product Manager, AI & GenAI Products Aug 2023 - Nov 2025

JioPC AI Assistant

- Led the 0-to-1 strategy and launch of an agentic AI copilot for 58,000+ JioPC users, improving resolution accuracy by 35% and deflecting approximately 50% of support demand.
- Unified fragmented assistant journeys through intent routing, RAG and contextual follow-ups, reducing duplicate queries by 60% and increasing NPS by 22%.
- Built a production GenAI evaluation framework across 150+ golden intents and designed Gemini-Llama model routing, optimizing task completion, faithfulness, latency, reliability and cost per session - establishing measurable quality gates for a live GenAI product.

Jio Financial Services

- Productized AI-driven credit decisioning using bureau, telecom and behavioral signals to improve access for thin-file and new-to-credit customers, increasing loan approvals by 18%.
- Launched real-time fraud and propensity scoring across 1.5M+ leads, reducing acquisition risk by 38% through risk-based segmentation and targeting.
- Shipped personalized insurance, coupon and next-best-action recommendations, increasing CTR by 15% and generating approximately INR 1.7M in quarterly revenue uplift.

Cyient | Software Engineer, Network Planning Products Aug 2018 - Feb 2022

- Delivered 6 network-planning products across 18 Agile sprints, partnering with product owners to translate business requirements into acceptance criteria and production releases.
- Automated product-testing workflows, reducing QA effort by 30%, time to market by 20% and production failures by 90% using Python and AWS.

INDEPENDENT PRODUCT VENTURES

- Built and launched ClearCFA, a 0-to-1 AI-powered exam-preparation product featuring adaptive question generation and a three-layer AI-output validation framework; acquired the first paying users within 30 days and grew the product to 100+ MAU. Live: praneethgollamudi.github.io/ClearCFA | GitHub: github.com/praneethgollamudi/ClearCFA
- Built and shipped TripCanvas, a 0-to-1 AI travel-planning product with a four-stage itinerary engine spanning destination discovery, itinerary generation, activity planning and trip customization. Live: srijaharshikad.github.io/TripCanvas | GitHub: github.com/srijaharshikad/TripCanvas

SKILLS

AI Product Leadership: Generative AI, LLMs, RAG, Agentic AI, Prompt Engineering, Model Evaluation and Golden-Set Testing, Model Routing, Guardrails, Confidence Scoring, Human-in-the-Loop, Hallucination Mitigation, AI Cost Optimization, Cross-functional Stakeholder Management (6+ groups), Compliance and Governance Alignment, Agile Program Delivery | Product Management: 0-to-1 Product Strategy, Roadmaps, PRDs, KPI/North-Star Definition, GTM, Customer Journey Mapping, Backlog Prioritization, Agile Delivery | Technical: Python, SQL, Java, LangChain, AWS, GCP Vertex AI, APIs | Domain: Regulated Lending and Model Risk, Credit Decisioning, Fraud and Propensity Scoring, Document Intelligence

CERTIFICATIONS

AWS Certified Cloud Practitioner | AWS Certified Developer | NASSCOM SSC Certified - AI Foundations | Digital Product Management - University of Virginia | Six Sigma Green Belt | Top 5% Product Management Professional - Pro5.ai | Accenture Strategy Case Competition - National Finalist, Top 16/8,500+

EDUCATION

Indian School of Business (ISB), PGP (Flagship), Strategy & Leadership / Product Management 2022 - 2023
Osmania University, Bachelor of Engineering, Computer Science 2014 - 2018
